

SAWS ORR R003754 – “data on the SAWS Desalination Plant(s)”

1. Hourly energy consumption (in kWh and \$ if possible) for the last 5 years. If hourly is not available, then daily for the last 5 years, and if not monthly for the past 10 years.

See attached record.

2. Hourly water production (in gallons or meter cube) for the last 5 years. If hourly if not available, then daily for the last 5 years, and if not monthly for the past 10 years.

See attached record.

3. Water quality (Turbidity & TDS) for incoming and outgoing water (data for the above period).

See attached record.

4. How much output water storage capacity does the facility have (how many tanks and how many gallons).

The two onsite storage tanks are 3 and 7.5 million gallons.

5. Does the plant have (or have you explored adding) onsite renewables or storage, and do you have any studies/reports/data you can share.

SAWS has no responsive information.
